PROFILE

I am a passionate developer with 6 years of experience in mobile app development, including 4 years focused on building high-performance apps using Flutter and Dart. I have successfully led teams and delivered projects from concept to deployment, ensuring efficient, scalable, and user-friendly applications. My passion for creating innovative solutions drives me to stay up to date with the latest technologies and best practices, continually enhancing user experiences.

EDUCATION

BACHELOR OF COMPUTER SCIENCE

2015 - 2020

Computer University (Monywa)

SKILLS

PROGRAMMING LANGUAGES

- Dart, Kotlin, Java, Javascript, Python, HTML, CSS, C#,

MOBILE DEVELOPMENT

- Flutter, Android, iOS
- Responsive UI, Animations, Widgets, Custom

STATE MANAGEMENT

- Bloc, Riverpod, Provider, GetX

BACKEND & API INTEGRATION

- Node.js, FastAPI
- RESTful APIs, GraphQL

VERSION CONTROL & DEVOPS

- Git, GitHub/GitLab, Bitbucket
- CI/CD, Fastlane, Codemagic

DATABASES & STORAGE

- SQLite, Hive, Firebase Firestore, PostgreSQL, MySQL, MongoDB
- AWS S3, Google Cloud Storage

AUTHENTICATION & SECURITY

- Firebase Auth, OAuth2, JWT, Social Logins

CLOUD & MONITORING

- Git, GitHub/GitLab, Bitbucket
- Fastlane, Firebase App Distribution

TESTING & QUALITY:

- Unit Testing, Widget Testing, Integration Testing

CERTIFICATE

ANDROID DEVELOPMENT TRAINING (SAMSUNG-TECH-INSTITUTE)

GOOGLE PLAY STORE LISTING CERTIFICATE

WORK EXPERIENCE

ANDROID DEVELOPER (INTERNSHIP)

May 2019 - August 2019

360ed Pte.Ltd

- I tested new software applications alongside my superiors.
- I collaborated with team members to investigate new software solutions.
- I provided technical support when necessary to the team.

JUNIOR DEVELOPER

October 2019 - June 2021

360ed Pte.Ltd

- I built educational AR apps and games for both Android and iOS using Unity.
- I worked closely with government stakeholders to ensure our app features aligned with academic goals for state government textbooks.
- I also provided technical support and helped with quality assurance for software testing and new releases.

FLUTTER DEVELOPER

November 2022 - December 2023

Tun Yat Pte.Ltd / Tun Yat Limited

- I was the lead developer for "SuBuu," a comprehensive fund management app I built with Flutter.
- I managed the whole development process using Scrum, Agile, and Jira to make sure we were efficient and on schedule.
- I introduced new features that streamlined financial processes, improving the system's efficiency and compliance.

FLUTTER DEVELOPER

December 2024 - March 2025

LeanCommerce

- I developed an AI-powered chat application with Flutter to improve user interaction.
- I also worked on a natural language search engine, making it better at handling complex queries and giving more accurate results.
- I maintained and optimized a medical health care application to keep it stable and running at its best.

FULL STACK ENGINEER / MOBILE DEVELOPER

December 2023 - Present

C3 @ Caring Code Creation

- As the tech lead, I made the key decisions on each project's scope, timeline, and tech stack.
- I managed the entire development process using Scrum and Agile with two-week sprints to keep the team on track and working together smoothly.
- I was hands-on with both Flutter mobile app and backend development, while also handling DevOps to ensure our solutions were robust and scalable.

PROJECTS

Vocabulary Builder AR

An educational mobile application designed to enhance English vocabulary through immersive Augmented Reality (AR) experiences and interactive learning games, catering to learners of all ages.

Technology Used:

- Frontend (Mobile): Unity
- AR Technology: Vuforia Image Tracker
- Other: Firebase Cloud Messaging for notifications, Git/GitHub for version control

Key Features:

- Augmented Reality Integration – Utilize AR to view and interact with 3D models of over 200 vocabulary words by scanning physical cards, enhancing visual and spatial learning.
- Interactive Learning Games – Engage in various games such as:
- Spell the Word: Practice spelling through interactive prompts.
- Find the Pictures: Match words with corresponding images.
- Match the Words with Images: Pair words to their visual representations.
- Choose the Correct Words: Select the appropriate word from options.
- Audio Pronunciations – Tap on 3D models to hear correct pronunciations, aiding in auditory learning.
- Offline Accessibility – Once activated, the app can be used without an internet connection, making it convenient for users in areas with limited connectivity.
- User-Friendly Interface – Simple navigation and intuitive design suitable for learners of all ages.

SuBuu

A mobile app built for farmers and agricultural stakeholders to improve sustainability, financial management, and digital access to resources. The ecosystem includes three integrated applications. The other two apps are **SuBuu-Community** and **SuBuu-Shop**.

Technology Used:

- Frontend (Mobile): Flutter, Dart, flutter_bloc (Clean Architecture)
- Backend: Node.js, MongoDB
- Cloud & Services: AWS EC2, S3, Firebase Cloud Messaging, Local SMS Gateway, Weather API Integration
- CI/CD: GitLab CI & Firebase App Distribution for automated builds, testing, and deployment
- Other: Voucher/receipt printing

Key Features:

- Revolving Fund Management – Track farmer loans, repayment cycles, and fund usage.
- Product Catalog & Order Management – Browse shop inventory, manage product sales, and record transactions.
- Voucher Printing – Generate branded invoices with shop name, logo, and contact details.
- Weather Support – Location-based weather information for farmers.
- Agricultural News – Access latest updates and announcements.
- Knowledge Base – Educational resources and farming techniques.
- Notifications

Nan San Japanese Book Shop

"Nan San Japanese Book Shop" lets you learn and shop in one place. Access a full JLPT N5–N1 audio library, browse and order Japanese books by category, and enjoy fast delivery across Myanmar with real-time tracking.

Technology Used:

- Frontend (Mobile): Flutter, Dart, flutter_bloc (Clean Architecture)
- Backend Integration: REST APIs
- Cloud & Services: AWS EC2, S3, Firebase Cloud Messaging
- CI/CD: Github Action.

Key Features:

- Comprehensive Audio Library – Access audio files for JLPT N5 to N1 levels, all organized in one place.
- Book Store Integration – Browse and purchase Japanese books by category at fair pricing. Delivery available across Myanmar
- Book Ordering & Delivery – Easily browse, select, and order Japanese books directly from the app, with organized categories, real-time order tracking, and delivery across Myanmar.
