MYAT NOE AUNG

SENIOR FLUTTER DEVELOPER

+66927018240 | myatnoeaung.dev@gmail.com | Bangkok, Thailand

Myat Noe Aung | Myat Noe Aung | Myat Noe Aung's Portfolio

PROFILE

Senior Flutter Developer & Tech Lead with 6+ years of total software engineering experience, specializing for 4+ years in Flutter and Dart. Demonstrated success in designing end-to-end mobile architecture, leading Agile dev teams, and shipping production apps across Fintech, AI, E-commerce, and EdTech. Skilled in Clean Architecture (Bloc/Riverpod), CI/CD automation, and cloud integrations.

EDUCATION

BACHELOR OF COMPUTER SCIENCE December 2015 - February 2020

Computer University (Monywa)

CERTIFICATE

ANDROID DEVELOPMENT TRAINING (SAMSUNG-TECH-INSTITITE)

GOOGLE PLAY STORE LISTING CERTIFICATE

WORK EXPERIENCE

FULL STACK ENGINEER / TECH LEAD

December 2023 - Present

C3 @ Caring Code Creation

- Technical Leadership: Served as Tech Lead directing architecture design, tech stack selection, and sprint planning for full-stack mobile and backend solutions.
- Agile Management: Facilitated 2-week Agile/Scrum sprints, driving cross-functional collaboration and ensuring on-time project milestones.
- Full Stack & DevOps: Developed cross-platform Flutter applications and scalable backend services while implementing DevOps practices to streamline release pipelines.

FLUTTER DEVELOPER - PART-TIME

December 2024 - March 2025

LeanCommerce

- AI Integration: Engineered an AI-driven chat feature in Flutter to improve user engagement and conversational interaction.
- Search Optimization: Enhanced natural language search engine performance to accurately process complex queries and return faster results.
- App Optimization: Maintained and optimized a medical healthcare app, reducing latency and ensuring high platform stability

SENIOR FLUTTER DEVELOPER

November 2022 - December 2023

Tun Yat Pte.Ltd / Tun Yat Limited

- Ecosystem Architecture: Led the development of "SuBuu"—a 3-app agricultural ecosystem (Main, Community, Shop) built with Flutter and Clean Architecture (Bloc pattern).
- Process Automation: Streamlined financial workflows and revolving fund management for farmers, improving tracking efficiency and system compliance.
- Agile Execution: Managed full app lifecycle from concept to deployment utilizing Scrum/Jira.

JUNIOR UNITY DEVELOPER

October 2019 - June 2021

360ed Pte.Ltd

- Developed augmented reality (AR) educational applications and games for iOS and Android using Unity.
- Collaborated with government stakeholders to align mobile features with official academic curriculum requirements.

ANDROID DEVELOPER (INTERNSHIP)

May 2019 - August 2019

360ed Pte.Ltd

- I tested new software applications alongside my superiors.
- I collaborated with team members to investigate new software solutions.
- I provided technical support when necessary to the team.

SKILLS

PROGRAMMING LANGUAGES

- Dart, JavaScript, Python, Kotlin, Java, C#, HTML, CSS

MOBILE DEVELOPMENT

- Flutter, Android Development
- Responsive UI, Custom Widgets, Animations
- Cross-platform Application Development

STATE MANAGEMENT

- BLoC, Cubit, Riverpod, Provider, GetX

BACKEND & API INTEGRATION

- Node.js, FastAPI
- RESTful APIs, GraphQL
- WebSocket, API Integration

VERSION CONTROL & COLLABORATION

- Git, GitHub, GitLab, Bitbucket

FIREBASE & MONITORING

- Firebase Cloud Messaging (FCM)
- Firebase Analytics, Crashlytics, Remote Config
- Firebase App Distribution

DATABASES & STORAGE

- MongoDB, PostgreSQL, MySQL, SQLite
- Firebase Firestore
- AWS S3, Cloudflare R2

AUTHENTICATION & SECURITY

- Firebase Authentication
- OAuth 2.0, JWT
- Google Sign-In, Apple Sign-In
- Firebase App Check

CLOUD & DEVOPS

- AWS EC2, Lightsail, ECR, S3
- Docker, Nginx
- CI/CD: GitHub Actions, GitLab CI, Codemagic, Fastlane
- Cloudflare

TESTING & QUALITY:

- Unit Testing
- Widget Testing
- Integration Testing

PROJECTS

BOSS - POS - Restaurant

(Flutter, Node.js, React, MongoDB, AWS, GitLab CI)

Developed a scalable restaurant POS and management platform for BOSS – Business Operation & Sales System, supporting order management, table management, kitchen workflows, payments, inventory, and multi-branch operations. Implemented role-based access for cashiers, waiters, kitchen staff, supervisors, and administrators. Integrated restaurant sales with inventory, purchasing, expenses, customers, suppliers, and business reporting to provide centralized operational visibility. Contributed to the development of Flutter POS applications, React management interfaces, and Node.js backend services, using MongoDB for data management. Deployed and maintained services on AWS, with GitLab CI for automated build and deployment workflows.

Vocabulary Builder AR

(Unity, Vuforia AR)

Augmented reality educational application featuring 200+ 3D vocabulary models, offline capabilities, audio pronunciations, and interactive mini-games for visual learners.

SuBuu Ecosystem

(Flutter, Node.js, React, MongoDB, AWS, GitLab CI)

A multi-app agricultural platform tracking farmer revolving funds, inventory management, and receipt printing. Integrated offline SMS capabilities, location-based weather data, and automated deployment via GitLab CI.

Nan San Japanese Book Shop

(Flutter, Clean Architecture, REST APIs, AWS, GitHub Actions)

E-commerce and learning app featuring an organized JLPT (N5–N1) audio player library, category book ordering, real-time shipment tracking across Myanmar, and automated CI/CD via GitHub Actions.
